1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

In the claims

Claims 14-16 have been cancelled

Claim 11, line 2, after "OSD", --with a sealing compound—has been inserted

2. Authorization for this examiner's amendment was given in a telephone interview with Mr. Hicks on April 15, 2005.

3. The following is an examiner's statement of reasons for allowance: The instant claims are considered to be allowable over the prior art of record in that the prior art fails to disclose, teach or suggest the overall aspects of using a male and female die set to die cut through a **recordable** data layer of a **recordable** optical storage disc with minimal damage to the recordable layer, recordable being given the definition as generally set forth at the top of page 3 of the instant specification. I.e., the instant recordable disks are not the same as the read only discs which are die-shaped in Rohde et al, and due to the differences in the data layers in each, it is submitted that such would constitute a patentable difference. Applicant's comments that Rohde et al does not cut through a data layer are not persuasive, but the limiting of the method to the shaping of a recordable optical disk is.

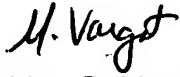

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
